- Define the number of days before a ship date to allocate inventory
- Review and manipulate requests according to current capacity prior to acceptance
- Allow simple manual and/or EDI receipt of releases and call-offs
- Automated balancing and correction of opening balances
- Extensive visual decision-support comparing existing plans and contractual arrangements before accepting changes
- Recorded new releases manually or through EDI
- Cross reference customer and supplier stock codes
- In-transit figure visible during confirmation phase
- Record notes against a release during confirmation
- On-line release history query by month and year

The screenshots show the SYSPRO software interface for Blanket Sales Orders and Releases. The top window displays a tree view of the 'Blanket S/O & Releases' menu, including options like Contract Maintenance, Release Maintenance, Release Review & Confirmation, Deliveries Maintenance, Release Master Query, Deliveries History Report, Release Acknowledgement Report, Purge Expired Releases, Purge Confirmed Releases, and Global P/order Change. Below this is a 'Release Master Query' form with fields for Customer (0000017), Customer Stock Code (BMW 6800), Stock Code (BS0100), and Lead time (2). The bottom two windows show 'Blanket S/O & Releases Monthly Cumulative History for Cust P/O: 580'. The left window shows a table with columns for Yr, Mch, delivered, Current, and Cumulative, with data for months from Jan to Dec. The right window shows a similar table with a 'View' dropdown set to 'Cumulative'.
